## UX / UI Project - Brief 5

### Arnold Clark Central Car Auctions

"Central Car Auctions (CCA) are Scotland's leading car auction house, selling over 2000 cars every week.

They have recently been acquired by Arnold Clark who have plans to expand into England as an outlet for some of the large volume of stock it is buying through **its car buying platform.**"

#### DELIVERABLES

- WEBSITE LANDING PAGE
- SOCIAL MEDIA CONTENT
- DEVELOPMENT SKETCHBOOK
- EVALUATION

Step through the process of  
bringing ideas to life...

10. Completed Brief  
Final Thoughts

Central Car Auctions (CCA) has recently undergone a rebranding initiative led by Arnold Clark, with the goal of expanding its digital presence and establishing itself as the UK's leading car auction house. The primary objective of this project is to design and develop a new homepage for the CCA website, along with engaging social media graphics for Facebook advertisements

The project aims to increase web traffic to the new CCA homepage via paid ads on Facebook and showcase CCA as an established brand and leader within the car auction industry.

LET'S DO THIS!

# Landing Page Development

Following the Gantt Chart I move on to ideation, sketching and exploring navigation maps.

The next stages of the process require focus on the user, competitive analysis, and an eye for design as we progress, implementing our research into our wireframe design.

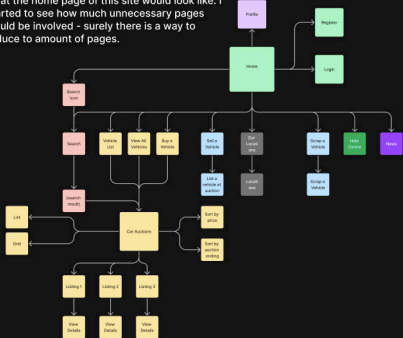

1.0

## INITIAL SITE NAVIGATION

The initial design explores all the web page options of that could be in the design. A lot of work would be required to fulfill each page, but would really cover all expectations for our users.

The first design of the wireframe represents what the home page of this site would look like. I started to see how much unnecessary pages would be involved - surely there is a way to reduce to amount of pages.

2.0

## Refined Site Nav Central Car Auctions

Refining the nav map down to a smaller website reduces the amount of clutter on the page, refines the user experience so ensures the user's basic need of searching for specific model/makes/and locations are easily accessible.

This new minimal design ensures that Alex - the savvy buyer - will be able to browse different models all from the home page.

# | 07. Requirements for landing page

**1.**

A header section.

**2.**

An easy way for users to start a search of stock available to purchase at auction, with the ability to filter by make/model/location.

**3.**

A clear message to summarise who and what CCA are.

**4.**

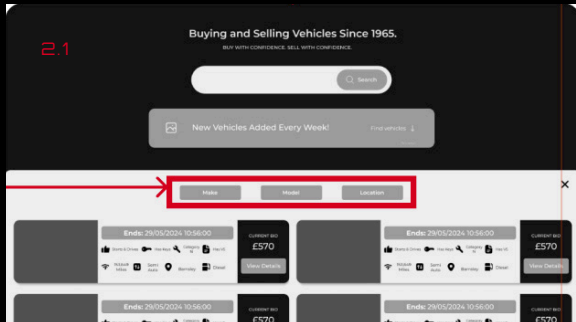

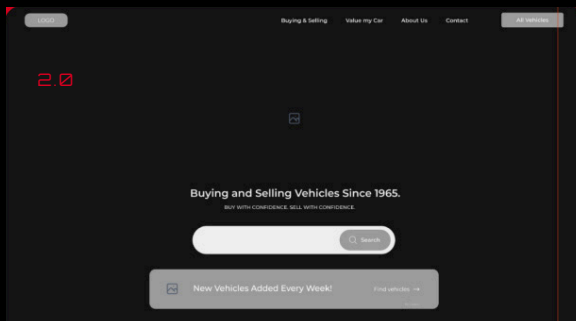

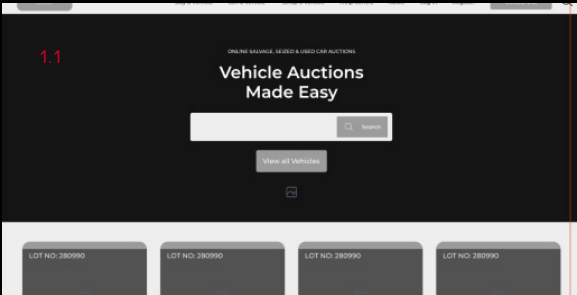

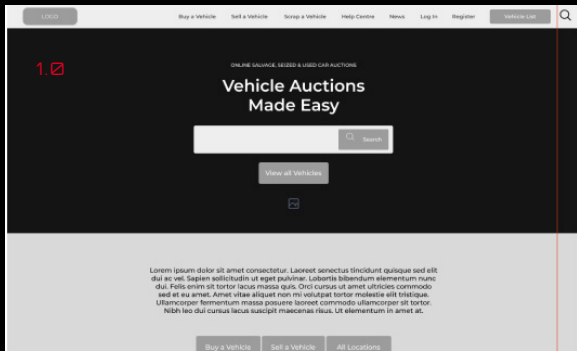

Space to showcase the unique selling points (USPs) of CCA – these will be provided in the supporting copy document.

**5.**

Space for customer testimonials/reviews.

**6.**

A footer section.

# | 10. Brief Completed

# | 10. Final Thoughts

1.

Although cars aren't 'my thing' I was glad that I took on this project regardless. The types of digital content required was more important than the content itself.

2.

I'm very glad that I took the full 12 weeks to complete the project. Having a lot of time for research and planning set up the rest of the project very well.

3.

More real user input, feedback from the target demographic, would have helped priorities the layout, imagery, and would have added confidence to design decision.

4.

I had issues with prototyping. The experience still jars when using it.

5.

More time could have been spent researching marketing campaigns and competitors social media content.

6.

I'm happy with the overall look of the landing page and content, adhering to the brief while being visually pleasing and consistent.

**Thanks for listening!**  
**Any questions?**
